Annex 2: Training Plan

NFT / Crypto Art	NFT stands for non-fungible token . They are unique and non-interchangeable units of data that are stored on a secure digital ledger (blockchain). Essentially, since they each have their own encryption code that cannot be hacked, they are certificates of authenticity. An NFT tracks the creator of the digital artwork, its market value, and its ownership. This makes it possible to authenticate an NFT just like you could authenticate a traditional painting.
Visual art	The visual arts are art forms that create works that are primarily visual in nature, such as ceramics, drawing, painting, sculpture, print-making, design, crafts, photography, video, film making and architecture. These definitions should not be taken too strictly as many artistic disciplines (performing arts, conceptual art, textile arts) involve aspects of the visual arts as well as arts of other types. Also included within the visual arts are the applied arts such as industrial design, graphic design, fashion design, interior design and decorative art.
